Project Portfolio

FLORA

FLORA is a tool that leverages data analytics and machine learning to optimize waste collection in cities or campuses

SKILLS DEVELOPED

- Utilize Microsoft's cloud computing tool, **Azure**, to leverage machine learning in waste fill levels to maximize efficiency
- Create wireframes for Dashboard using **Adobe XD** and conducted extensive user testing with operation managers to better functionality and interface
- Publicly presented idea to various stakeholders and received a letter of interest from BC's second largest university to test technology

UBC ROCKET

A student engineering design team at the University of British Columbia dedicated to the design, manufacture, and launch of suborbital rockets. The team are also the winners of the 10,000 feet Commercial Off the Shelf (COTS) category at Spaceport America Cup.

SKILLS DEVELOPED

- Utilize **Solidworks** to create a 3D render of a liquid fuel heat sink engine
- Manage finances, budgeting, and sponsorships for the largest engineering design team at UBC
- Cycle between avionics, propulsion, and aerodynamics teams and proved robust structural design validated by **FEA** for construction
